

Back-To-School Checklist

It's time for back-to-school shopping! This checklist includes 18 items that you might see while shopping for school supplies. But which ones do you really need? First, identify the items that you should get for school – but be careful we've put a couple tricks on the list! Cross out the items that you do not need for school. Then, estimate how much each of the remaining back to school items will cost. Use the estimated cost to help create a budget for back-to-school shopping. After you finish shopping, use the receipt to compare the actual cost and see where you under or overestimated.
